## In the Palm of your Hand

Weinberger's newest innovation, the wide angle 16 mm lens, an ideal match for high speed cameras in HI-G testing applications. This small and light weight lens comes in the well known C-mount format and amazingly, this lens covers a very large image circle of 20 mm. The large image circle coverage means not only the full resolution (1536 x 1024) of the SpeedCam Visario is fully covered, but many other high resolution sensors are covered too! In addition, the 16 mm is Hi-G ready which makes it well suited for onboard testing where weight and size are critical factors.

## Technical Description

### Weinberger Lens

**Focal Length**  
**F-Stop**  
**Camera Mount**  
**Mechanical Stability**  
**Hi-G Crash Cage**  
**Weight**  
**Size**  
**Image Circle Coverage**

- 16 mm
- F/1,8
- C-Mount
- 100 G's in all 3 axes
- Built into lens
- 150 g (5.2 oz)
- 70 x 48 mm (2.8" x 1.9")
- 20 mm diagonal
