SPEEDCAM
VISARIO *Accessories* – *convincing arguments*

Software	**The optional control software VISART adds substantial functions to the standard software:**
	• Configurable on screen display of parameters incl. comments in AVI-movies • Immediate adjustment of contrast, brightness and white balance • Replay of raw data sequences in high speed. • Production of QuickTime-movies • Pre-sets of standard recordings safed as templates • Multi host operation • Hardware-independent rawdata-player with the possibility to convert to AVI-sequences • IRIG-B integration (time code)
Lenses	• From 9,8 to 600 mm • Special lenses on request • Lens mount adapters for many common lens types
Linkbox	Up to four cameras can be operated by means of a Linkbox, with distances of max. 100 m to the control unit. Upon definition of the parameters, the Linkbox can be separated from the control unit and remains operational without cable connection.
Linksplitter	The max. cable length of camera's directly connected to the control unit can be extended by a Linksplitter from 15 m to max. 75 m.
Remote Control	The camera set-up can be adjusted easily and comfortably without direct connectioin to the control unit by the optional remote control (connected by cable or as a radio version). The remote control is connected to the Linkbox and live-pictures of the connected camera can then be displayed on the integrated LCD-monitor. As an alternative, control is also possible via a laptop integrated in the network and via the control software Visart.
Cables	• Camera cables length of up to 100 m • Special cables on request • Fibre optic cables of up to 400 m (greater distances on request)
Camera Upgrading	SpeedCam Visario cameras LT 400 and LT 800 can be upgraded anytime to the top model SpeedCam 1500.
Lighting	• HMI lights 400 W or max. 2 kW (3 kW in boost-operation) • Cold lights with swan-neck light conductor • Halogen lights up to 2,5 KW for B/W- camera systems
Monitors	• High resolution TFT-Monitors from 17,4" to 20" • Sun light readable monitors for outdoor applications • SVGA monitors
Transportbox	Transport box for SpeedCam Visario systems for protection and safe transportation.
